# INDEX OF ABSTRACTS

## Volume 17 (1970)

Abbott, James H. Quasi-integrable products of independent random variables, 420.

Abe, Kin-Etsu. On the completeness of leaves of the nullity and relative nullity distributions. Preliminary report, 451; On the characterization of totally geodesic submanifolds in $S^N(\tilde{c})$ and $CP^N(\tilde{c})$ by some inequalities. Preliminary report, 575; On the complex analogue of Hartman-Nirenberg's cylinder theorem. Preliminary report, 669.

Abhyankar, Sheeram and Heinzer, William J. Ramification in infinite field extensions, 1023.

Abhyankar, Shreeram, Heinzer, William J. and Eakin, Paul. Isomorphisms of polynomial rings, 763.

Abian, Alexander. Decomposition of commutative semisimple rings into direct product of integral domains, 281; On isomorphism of partially well ordered sets, 559; On a property of reduced powers, 673; Prime ideals of atomless Boolean rings, 968.

Abian, Alexander and Bainbridge, James. On the consistency of the Generalized Continuum Hypothesis, 836.

Abrams, Robert A. Nonlinear programming in complex space: Sufficient conditions and duality, 448.

Abrams, Robert A. and Ben-Israel, Adi. Nonlinear programming in complex spaces: Necessary conditions, 448.

Aczél, Janos D. Proof of a theorem on distributive type hyperidentities, 87.

Aczél, Janos D. and Forte, Bruno. A system of axioms for the measure of the uncertainty, 202.

Addis, David. A generalization of completely regular mapping. Preliminary report, 419.

Adeniran, Tinuoye M. Monotone union properties in topological spaces, 459.

Agarwal, Arun Kumar. On the geometric means of entire functions of several complex variables, 773.

____. See Chak, Anand M.

____. See Srivastava, S. N.

Agrawal, Jagdish C. Global stability in a class of nonlinear partial differential equation, 441.

Agrawal, Jagdish Chandra and Bhattacharyya, S. P. Potential distribution due to a current in a conducting liquid contained in a cylindrical tank. Preliminary report, 449.

Agrawal, Jagdish Chandra and Madan, V. P. Unsteady laminar flow of a viscoelastic fluid between two flat plates under a transverse magnetic field, 292; Steady flow of a viscoelastic conducting fluid between two porous parallel flat plates in the presence of a transverse magnetic field, 449.

Aharonov, Dov and Walsh, Joseph L. On the convergence of rational functions of best approximation to a meromorphic function. Preliminary report, 957.

Ahern, P. R. and Clark, D. N. Radial Nth derivatives of Blaschke products, 522.

Ahmad, Shair. Oscillatory behavior of a class of linear fourth order differential equations. Preliminary report, 292, 444.

Ahmad, Shair and Lazer, Alan C. A uniqueness theorem for periodic solutions of a class of second order nonlinear systems, 957.

Aitchison, Peter W. Some results on ellipsoids, 963.

Akemann, Charles A. Approximate units and maximal abelian C*-subalgebras, 391.

Al-Bayyati, H. A. See Hamdan, M. A.

Alas, Ofelia T. A proposition equivalent to the Zermelo theorem, 475; Topological groups and the GCH, 832; Density and continuous functions, 970.

de Alcantara, L. P. On a system of Houdebine, 671.

Alex, Leo J. On simple groups whose order is of the form $2^a3^b7^cp$. Preliminary report, 1069.

Alford, William R. See Schaufele, Chris B.

Alo, Richard A. See De Korvin, Andre.

Alo, Richard A. and Shapiro, Harvey L. Countably paracompact, normal, and collectionwise normal spaces. Preliminary report, 681.

Alperin, Jonathan L. Simple groups of small 2-rank. Preliminary report, 545.

Alpert, Louis I. Directional deviation norms and surface area in n+1-dimensional Euclidean space, 197.

Alspach, Brian R. and Berggren, John L. On the determination of the maximum order of the group of a tournament, 1043.

Alter, Ronald and Lientz, Bennet. A graph theoretic interpretation of a problem of Smirnov, 412.

Alton, Donald Alvin. Recursively enumerable sets which are uniform for finite extensions. Preliminary report, 674.

Amberg, Bernhard. On groups with chain conditions, 540.

Amelin, Charles F. A norm characterization of

continuous linear operators on locally convex spaces. Preliminary report, 789.
Amer, Mohamed A. and Hanf, William P. Boolean algebras of logics of higher order, 585.
Anderson, Bruce A. Families of mutually complementary topologies, 974.
Anderson, Edmund H. Chains of simple closed curves and a dogbone space, 524.
Anderson, Robert V. See DeCicco, John.
Anderson, Tim. Local nilpotence in varieties of rings, 1069.
Andrews, George E. An extension of Schur's second partition theorem, 300.
Andrushkiw, Joseph W. The number of distinct terms in the expansion of the determinant of a symmetric matrix, 111.
Anson, Dennis. Totally ordered acts, 1038.
Anthony, Joby Milo. Operator convergence, 130.
Anton, Howard and Pervin, W. J. A Hahn-Banach theorem for complex semifields. Preliminary report, 190.
Apostol, Tom M. On the nonvanishing of homogeneous product sums, 1043.
Appling, William D. L. Continuity and the subdivision norm infimum function, 438; A yet more elementary proof of part of the Bochner-Radon-Nikodým Theorem, 565; Continuity and set function summability. Preliminary report, 653; A note on differential equivalence. Preliminary report, 953.
Arganbright, Deane E. A class of subgroups of a finite p-group, 767.
Armendariz, Efraim P. Semiprime rings with torsionless injective hull. Preliminary report, 431.
Arnold, David M. Adams operations for Grothendieck rings of modules. Preliminary report, 265.
Arnold, Jimmy T. and Brewer, James W. On flat overrings, ideal transforms and generalized transforms of a commutative ring, 279; Essential valuation overrings of D[X] 1022.
Arnold, Leslie K. Completely unbounded transformations in ergodic theory, 954.
Aronszajn, Nachman. On a theorem in the theory of polyharmonic functions, 218.
Aronszajn, Nachman, Brown, Robert D. and Butcher, Ralph S. On the solution of the biharmonic problem in a rectangle. Preliminary report, 225.
Arora, K. L. Thermoelastic stresses in the flexural deformation of a block, 800.
Arrison, John D. On a class of partially stable noncommutative algebras, 528.
Arsove, Maynard G. and Leutwiler, H. Painlevé's theorem and the Phragmén-Lindelöf maximum principle, 416.
Asadulla, Syed. On the existence of a primitive ternary quadratic form, 122.
Astor, Peter H. A sufficiency theorem for a linear control problem, 247.
Atalla, Robert E. P-set in $\beta N - N$ and regular matrices. Preliminary report, 931.
Atkinson, Kendall E. An iterative method for the numerical solution of Fredholm linear integral equations of the second kind, 142.
Atneosen, Gail H. One-dimensional n-leaved continua, 406.
Aull, Charles E. Normal bases containing the zero sets, 167; Prufer domains and f-ideals, 1022.
Auslander, Louis and Brezin, Jonathan P. A problem in combinatorial group theory, 1050.
Avila, Geraldo S. S. Spectral resolution of differential operators associated with symmetric hyperbolic systems, 934.
Bachman, George. See Beckenstein, Edward.
Bachmuth, Seymour. Lie rings of characteristic two. Preliminary report, 399.
Bacopoulos, Alex C. Simultaneous approximation, 534.
Bacsich, Paul D. Effective equivalents of the Rasiowa-Sikorski Lemma, 457; Compact injectives in Nonstandard Analysis, 836.
Bagby, Thomas. Rational interpolation and logarithmic potentials, 144.
Baggs, Ivan. Properties of some noncontinuous functions, 469.
Bahauddin, Mohammed and Thomas, John D. The Čech homology theory and the completion of a uniform space, 142.
Bailey, Paul B. and Barr, George E. Diffraction by a curved edge, 93.
Bainbridge, James. See Abian, Alexander.
Bajaj, Prem N. Some effects of reordering the factorisation in a product semidynamical system. Preliminary report, 777.
Bajpai, S. K. Coefficient estimates for univalent $\alpha$-spiral functions, 823.
____. See Srivastava, R. S. L.
Baker, James D. A remark on the existence of $\psi$-integrals, 219.
Baker, James D. and Shive, Robert A., Jr. On the existence of $\Psi$-integrals, 816.
Baker, Kirby A. See Stralka, Albert R.
Bakshi, J. S. Diffusion from laminar flow containing sources, 451.
Balas, Egon and Jeroslow, Robert. The hypercube and canonical cuts, 450.
Balbes, Raymond and Dwinger, Philip. Coproducts of Boolean algebras and chains with applications to Post algebras, 241; Uniqueness of representations of a distributive lattice as a free product of a Boolean algebra and a chain, 433; Subdirect products of three element chains. Preliminary report, 809.
Baldwin, J. T. $\aleph_1$ categorical theories whose models are the closure of strongly minimal sets. Preliminary report, 834; $\alpha_T$ is finite for $\aleph_1$ categorical T. Preliminary report, 967; A note on definability in totally transcendental theories. Preliminary report, 1078.
Ball, Eugene S. Weak normality and limit point compactness. Preliminary report, 245;

Weak normality and functions, 461.
Ballew, David W. Module index and invertible ideals, 96; Projective modules and the module index, 431; A generalization of a theorem of Fröhlich, 764.
Bandyopadhyay, Utpal K. Integral representation of nonlinear transformation, 255.
Banerjee, M. B., Chandra, S. and Misra, A. K. A complex variable approach to Poisson's boundary value problem. Preliminary report, 1072.
Bang, Chang Mo. Modules over complete discrete valuation rings, 102.
Banilower, H. Quotients of Stonian spaces and injectivity of C(X). Preliminary report, 267.
Banks, Harvey T. See Jacobs, Marc Q.
Banks, Harvey T. and Jacobs, Marc Q. The optimization of trajectories of linear functional differential equations, 100.
Barker, George P. Monotone norms. Preliminary report, 537; The lattice of faces of a convex cone, 829.
Barr, George E. See Bailey, Paul B.
Barrett, Lida K. and Yust, C. S. Topological sintering models, 110.
Bartelt, H. W. Multipliers and operator algebras on bounded analytic functions, 664.
Barth, Karl F. and Schneider, Walter J. On a question of C. Renyi concerning the behavior of entire functions in sectors, 234.
Barth, Theodore J. Taut and tight complex manifolds, 158.
Bartlow, Thomas L. A necessary and sufficient condition for all parastrophes of a power-associative n-ary quasigroup to be power-associative, 168.
Barton, Eric M. On some problems of Borsuk. Preliminary report, 685.
Bash, David Winfield, Jr. Sums and products of normal functions and very normal functions, 771.
Bass, Charles D. and Daverman, Robert J. A self-universal crumpled cube which is not universal, 465.
Basu, Adhir Kumar. A note on Strassen's version of law of the iterated logarithm, 837.
Batt, Jürgen O. On the weak compactness of certain integral operators of Hammerstein type, 1058.
Batten, George W., Jr. Uniqueness of functions from sums of averages, 243.
Baum, Richard F. An existence theorem for optimal control systems with state variables in C, and stochastic control problems, 214.
Baumgartner, James E. Decompositions and embeddings of trees. Preliminary report, 967.
Baumgartner, James E., Malitz, Jerome I. and Reinhardt, William N. Embedding trees in the rationals, 966.
Baumslag, Gilbert. Short one-relator groups, 1054.
Bayer, Clarence E. See Perryman, John K.
Bazley, Norman W. and Fankhauser, Hans R. Pointwise estimates of eigenfunctions for Schrodinger operators, 933.
Bechtell, Homer F. Series in solvable K-groups, 92.
Beck, Istvan. The flat overrings of a domain. Preliminary report, 282; Injective modules over a Krull domain. Preliminary report, 423.
Beck, Robert E. and Kolman, Bernard. Generation of the Weyl group on a computer, 417; Multiplicities of Lie algebra representation on a computer, 417.
Beckenstein, Edward, Bachman, George and Nirici, Lawrence R. Maximal ideals in topological algebras, 820.
Bednar, J. Bee. Facial characterizations of ordered Banach spaces which are abstract (L)-spaces. Preliminary report, 518.
Bednar, J. Bee, and Duris, Charles S. A discrete Fourier analysis associated with discrete function theory, 113.
